

# AccuVote®-TS

## Touch Screen Voting Solution

### AccuVote®-TS Features:

- > Eliminates overvoting/reduces undervoting
- > On-screen write-ins
- > Voice guidance for visually impaired
- > Straight party and crossover voting
- > Redundant, secure storage devices protect election results
- > Election data is encrypted for protection
- > Complete electronic audit files
- > Simple opening and closing steps
- > Adjustable screen for maximum ergonomics

### SIMPLE, SECURE, PROVEN TOUCH-SCREEN VOTING WITHOUT GEOGRAPHIC LIMITATIONS

AccuVote®-TS is a robust voter-activated touch screen voting system utilizing intelligent voter card technology. Each ballot station uses a direct-entry computerized voting application that automatically records and stores encrypted ballot information and results.

Integrated system components include:

> **The AccuVote-TS Ballot Station.** The heart of the system – tabulates votes quickly and reliably, and transmits results to the host computer at election central.

> **GEMS® Application Software.** This proprietary multi-user/multi-functional Microsoft®-based software performs all election functions seamlessly. It concurrently and automatically generates:

- All appropriate ballot styles for each precinct
- Postscript ballot files for postal ballots that eliminate manual typesetting and proofing
- Vote tally files which receive totals needed to produce and distribute accumulated election results

### WHY ELECTION OFFICIALS PREFER ACCUVOTE-TS

- > **Eliminates overvoting.** AccuVote-TS allows only the appropriate number of candidates to be selected.
- > **Reduces undervoting.** Ballot summary page privately highlights races that may have been overlooked.
- > **Complete.** AccuVote-TS gives election administrators the ability to put every ballot style within the voting jurisdiction on each ballot station.

# ACCUVOTE-TS – THE PREFERRED TOUCH-SCREEN SYSTEM

## > **Intelligent voting card technology.**

Enables interaction between the voter and the AccuVote-TS without poll worker intervention.

## > **Multilingual.**

Each AccuVote-TS can support many languages in both standard and ADA modes. Seven languages already used in actual elections – an industry exclusive!

## > **Provisional voting.**

Ballots completed by provisional voters can be electronically stored until verification occurs.

## > **Voice guidance capability.**

Visually impaired voters can vote on the same unit as other voters, utilizing a headset and keypad.

## > **Complete audit trail.**

System provides a full complement of Electronic Audit Files that may be converted to hard copies on demand. Real time pre- and post-election transaction audit logs are also available.

## > **Fast results.**

At the end of the voting period, the system can print precinct totals to be included as part of the permanent record and modem results to a host computer.

## > **Fast, accurate data transfer.**

Premier's industry-standard system – TeleResults – uses standard landlines or cellular telephones for modem transmission of precinct results directly from the polling place to the host computer.

## > **Large capacity ballot screen**

can accommodate 50 or more candidate names within a single office on a single screen – eliminating confusing multi-page ballots.

## WHY VOTERS PREFER ACCUVOTE-TS

### > **Simplicity.**

AccuVote-TS lets voters cast their votes by simply touching large target areas on an electronically generated ballot.

### > **Largest and brightest high-resolution color screen**

in the industry. Touch screen has 117.5 square inches of viewable area.

### > **Adjustable screen.**

Enables voters of virtually any height to easily access the ballot screen.

### > **Private voting for the visually impaired.**

AccuVote-TS uses a voice guidance system that reads the ballot aloud. The voter makes ballot selections by listening to spoken prompts and pressing a corresponding key on a keypad.

### > **Ballot magnification.**

Any ballot can be magnified to assist visually impaired voters and voters with physical dexterity issues.

### > **Voters can cast their ballot anywhere,**

on any ballot station, at any time, without geographic limitations – encouraging early voting.

### > **Wheelchair access.**

The touch-screen can be locked at a right angle position to assist voters in wheelchairs, and available space under the well-designed voting booth provides ample, convenient access.
