

AutoMARK™ Voter Assist Terminal

Single Source for Election Solutions

Proven benefits

- > **Ensures** privacy and accessibility to voters with disabilities
- > **Supports** multiple languages for diverse voter population
- > **Maintains** security and auditability to ensure integrity
- > **Minimizes** over-voting and under-voting
- > **Enables** write-in candidates

A BREAKTHROUGH IN BALLOT MARKING TECHNOLOGY

Developed with assistance from election authorities and disability organizations, the AutoMARK™ Voter Assist Terminal (VAT) is an optical scan ballot-marking solution that provides broad voter privacy and accessibility. It assists voters who are visually-impaired, or have physical impairments that would make it difficult or impossible to mark a ballot in the usual way. The AutoMARK VAT also provides language assistance to voters who are more comfortable speaking an alternative language or who have reading challenges.

The VAT gives voters all the benefits of a touch screen with the added reassurance of a printed paper ballot. The voter is able to verify selections prior to any marks being made on the ballot. An audio function allows visually impaired voters to listen to their choices prior to marking the ballot.

The AutoMARK VAT is Federally qualified and includes accessibility features such as a touch screen with a zoom and contrast feature, multiple language translation, and a keypad marked in Braille. The VAT also works with any two-switch stereo Assistive Technology device such as a "Sip 'N Puff" or the AutoMARK Access Pad.

THE SIMPLE SOLUTION FOR ALL VOTERS

- > **Multiple Languages** – Supports up to nine languages for those voters who are more comfortable voting in a language other than English.
- > **Accessibility** – Includes a touch screen, access port for Sip-N-Puff technology, multiple language translation, keypad with Braille, and an intuitive access pad / foot pedal.
- > **Privacy** - Allows voters with disabilities and other special needs to mark a ballot privately and independently.

THE AUTOMATED SOLUTION FOR VOTERS WITH DISABILITIES

HOW AUTOMARK MAKES VOTING ACCESSIBLE:

- > Designed for those who are unable to mark their own optical scan ballot due to physical challenges or impairments.
- > No special ballot necessary; voters with disabilities or who require language assistance use the same ballot as other voters.
- > Fully audible; the AutoMARK VAT simply marks a paper ballot that is then cast by the voter. The paper ballot can be audited in the same manner as hand marked ballots.
- > Minimizes the risk of over-voting by providing voters with a summary page of their selections for confirmation prior to ballot printing. An audio function is available for blind or visually impaired voters to listen to the choices through headphones.

TOUCH SCREEN

And voice-narrated ballot

YES/NO PADDLES

For those with limited dexterity.

The access pad provides:

- > Braille markings
- > Scroll and select markings for No and Yes
