

# Premier Central Scan

Transparent > Secure > Auditable

## The complete, dependable solution

- > **Accessible** ballot information and adjudication details
- > **Secure** encrypted data storage
- > **Audit** logging and log filtering
- > **Proven** digital imaging technology provides ballot flexibility and accuracy

## MAXIMIZE ELECTION DAY RESOURCES

The Premier Central Scan (PCS) delivers unparalleled central count process management with tools and controls that give you both flexibility and security. PCS allows access to all ballot information and all adjudication activities at any time for total control.

Our system is a comprehensive approach that transforms manual tallying and sorting into an automated process that saves time, increases productivity and streamlines the entire scanning operation. Designed for high-volume usage in even the largest jurisdictions, the technology combines advanced hardware and the latest software to simplify the paper ballot counting process.

## COUNT ON PREMIER

When you choose Premier Election Solutions, you get a partner with broad industry expertise and a commitment to precise implementation and support before, during, and after your purchase.

## THE ACCURATE AND SECURE SOLUTION

- > **Data Encryption** – Data is encrypted on disks using an encryption key derived from a customer-entered password
- > **Application Security** – All elements of the application software are digitally signed by Microsoft's Authenticode™ security mechanism
- > **Audit Logging** – Extensive audit logging and log filtering/browsing capabilities
- > **User Access Management** – Privileges and restrictions can be assigned on a per-user and per-function basis to ensure data is securely protected

# TRANSFORM MANUAL TALLYING AND SORTING INTO AN AUTOMATED, STREAMLINED PROCESS

## PREMIER CENTRAL SCAN KEY FEATURES:

- > Secure, encrypted data storage
- > Capable of pre-processing ballots by restricting both the tally process and report generation before Election Day
- > Scans both sides of ballot at 200 x 200 dpi
- > Optional electronic ballot adjudication allows exception ballots to be flagged for later review while scanning continues without interruption
- > Ballot is electronically captured and stored as an image
- > Processes 11" to 18" ballots
  - 11" (2-sided) up to 5,000 per hour
  - 14" (2-sided) @ 2,500 - 3,300 per hour
  - 18" (2-sided) @ 2,300 - 3,200 per hour
- > Runs with small PS900 scanner
- > An easy-to-use system with a small footprint

## MAXIMIZE ELECTION DAY RESOURCES:

- > A paper ballot processing system that is fast and efficient
- > Reduces the money, time and staff required on Election Day
- > Automated process of handling paper ballots produces faster, more accurate results

## PREMIER CENTRAL SCAN

Provides easy and flexible configuration, full-featured security, and administrative controls.

- > Access to ballot information and adjudication details
- > Provides an independent audit of official results
- > Full reporting capabilities, including summary, adjudication, status and write-in reports.
- > Audit logs and filtering controls
- > Sophisticated security platform to help maintain the integrity of the data
- > Easy and flexible configuration
- > Full-featured security

## CENTRAL COUNT TABULATION

Reads and sorts ballots on a continuous basis, automatically diverting exceptions into separate bins without interruption.

- > Small footprint
- > Weighs less than 100 lbs.
- > Reads 11", 14", 17" and 18" ballots
- > Ballot sorting to three output stacking bins
- > Separates double feeds
