

VoteRemote™ Suite

The Smarter Absentee Voting Solution

VoteRemote™ Suite

The Smarter Absentee Voting Solution

When it comes to Absentee Voting, election jurisdictions across the country are faced with the same kinds of problems: lack of manpower, spiraling mailing expenses and obsolete technology. Now more than ever before, resources are stretched to their limit and beyond with no relief in sight.

That's why Premier Election Solutions has a better, smarter way – VoteRemote™ Suite. Simply put, it's changing the way Absentee Balloting is done.

Across America, Premier teams up with small, medium and large jurisdictions to provide an absentee voting solution that seamlessly integrates with their current process. We combine the latest software systems with proven automation to create a state-of-the-art absentee solution that saves time and money – up to 50% versus traditional fulfillment. With millions of mail packets successfully sent annually, you can have the peace of mind that VoteRemote can give.

THE KEY: REDEFINE THE PROCESS

VoteRemote Suite puts a new process in place for both outgoing and incoming mail packets, including all associated envelopes and necessary content. This process can be handled directly by Premier at one of our facilities or done in-house by the jurisdiction, depending on scope and needs.

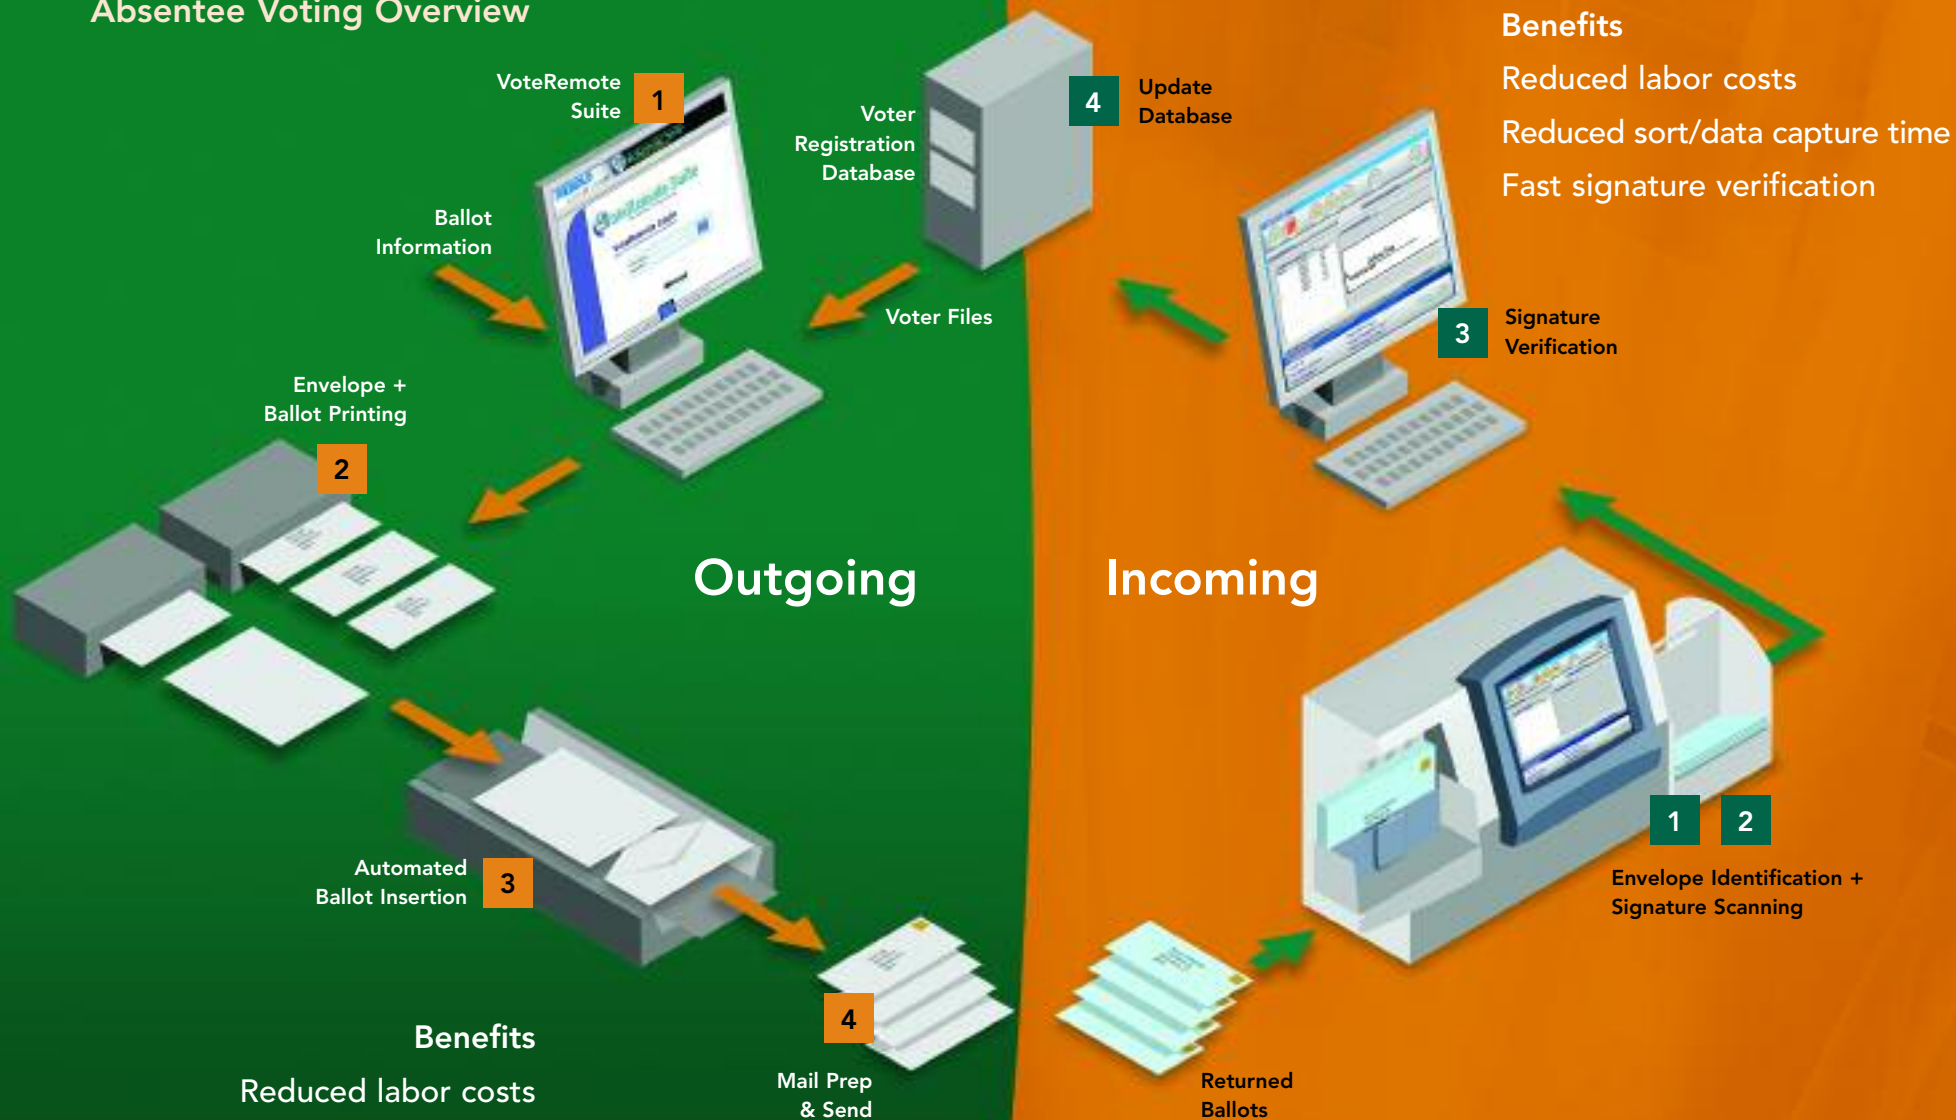

VoteRemote Outgoing Process

VoteRemote streamlines the preparation of Absentee packets. At our Outgoing Facility, we use proven technology to automate the processing, printing and mailing of outgoing mail packets.

- 1. VoteRemote combines your ballot information** with your voter registration database and verifies that data via the United States Postal Service database.
- 2. VoteRemote produces the necessary mailing files** (ink jet or PDF) and prints the mail packets.
- 3. VoteRemote features camera matching technology** for automated high-speed mail insertion, eliminating costly hours of manual labor and dramatically reducing the total time needed for completion of mail packets.
- 4. VoteRemote prepares the mailing** and can lower mailing costs by securing First Class service at a nonprofit postage rate. And VoteRemote includes USPS Mail Tracking enabling tracing from mailing to delivery.

VoteRemote Suite is scalable and customized to accommodate the size and needs of your jurisdiction – small or large, rural or metropolitan.

VoteRemote Suite Absentee Voting Overview

Benefits
Reduced labor costs
Reduced processing time
Reduced mailing costs

Benefits
Reduced labor costs
Reduced sort/data capture time
Fast signature verification

VoteRemote

Incoming Process

VoteRemote streamlines the validation of incoming absentee envelopes. Using a high-speed envelope scanner to automate the process, VoteRemote reduces the amount of manpower used, while increasing accuracy of identification. Our envelope scanners are transportable and scalable for all types of jurisdictions, adding flexibility and speed – each scanner can process up to 3,600 envelopes per hour.

- 1. VoteRemote scans an incoming envelope** to confirm that it is from a registered voter and that it is not a duplicate. It also stores an image of the envelope's signature area.
- 2. VoteRemote generates an endorsement trail** which includes a batch number, sequence number and bar code number to record and identify each envelope.
- 3. Signature verification can be handled in one of two ways:** Premier's manual on-screen side-by-side comparison, or by using Premier's Automated Signature Recognition software. This software allows the jurisdiction to control the level of signature-matching required and is similar to that which the banking industry has been successfully using for years.
- 4. The scanned information is used to update** the jurisdiction's database to maintain up-to-date signature and voter history data.
